Lester Snow director of CalFed -

Dear Lester, Please consider this
a response to the CalFed Plan

~~I oppose CalFed's plan to increase surface~~
water by raising existing dams or building
offstream reservoirs enough damage has
been done already - we need to save
California's natural resources, not
exploit them for the sake of large
agribusiness. I support CalFed's proposed
restoration goals for central valley including
removing some facilities such as englebrecht
dam, that act as barriers to migrating salmon
in a very important riparian habitat, and
increasing instream flows for fish, wildlife and
recreation. we however, cannot solve ecological
problems caused by dams and diversions by
building more dams and diversions.

Thank you for your fine and 849(2)
consideration I look forward
to hearing your position on this issue.

Sincerely ~~Cris Hardy~~
